PROFESSIONAL OVERVIEW

Applied AI & Machine Learning Engineer who builds and deploys production AI systems across computer vision, conversational AI, and intelligent automation. Experienced in building and deploying Machine Learning (Scikit-learn, MLPs & Neural Networks) models, LLM-powered workflows, RAG, Agents and MCP tool servers, with a focus on systems that run reliably under real-world conditions.

WORK EXPERIENCE

ML & BACKEND ENGINEER | FIELDWATCH, LAGOS, NIGERIA (REMOTE) **OCT 2025 – PRESENT**

- Fine-tuned YOLO, DeepLab, and Meta SAM on 3,100 labelled aerial, drone, and satellite tiles for segmentation and detection, reaching **0.94 IoU** with DeepLab.
- Developed a powerline defect detector (YOLO11-s, INT8) reaching **0.726 Box AP vs. 0.721 published** at ~10.6 MB and CPU-capable; built a SAM3 pipeline detecting poles, transformers, and insulators in drone imagery.
- Built and operate the production GPU inference backend (FastAPI, SAM3) behind a Cloud Run proxy, serving vectorization from drone and satellite rasters.
- Built geometry post-processing (morphology, orthogonalization) that turns raw SAM masks into clean, GIS-ready building polygons.
- Shipped and maintain FieldWatch Vectorizer, a QGIS 3.x/4.x plugin on plugins.qgis.org: on-device SAM 2.1 segmentation, cloud large-area vectorization, Gemini-based imagery editing, and drone imagery ordering.

AI ENGINEER | CENCORI, SAN FRANCISCO, US (PART-TIME) **JUN 2026 – SEP 2026**

- Built and maintained Cencori's read-only MCP server, exposing the inference runtime and agent execution primitives to public and authenticated clients.

DATA SCIENTIST & AI/ML ENGINEER | IHIFIX TECHNOLOGIES, KADUNA, NIGERIA **FEB 2025 – AUG 2026**

- Shipped **ChurnPred**, an end-to-end MLOps pipeline on 37k records: XGBoost champion (**ROC-AUC 0.976**, F1 0.939) vs. PyTorch challenger, MLflow tracking and registry, FastAPI inference API, Docker deployment.
- Built MCP tool servers (stdio) exposing payment and registration data to LLM agents, and RAG pipelines that ground responses in internal datasets to reduce hallucinations.
- Built LLM applications with Hugging Face Transformers and LLaMA, including tool-calling loops and structured system prompts for retrieval and customer interactions.
- Developed a fraud detection system (XGBoost, Bayesian modelling, cross-validated tuning) achieving **91% accuracy**.
- Built Django REST Framework and FastAPI backends, plus n8n automations integrating Paystack webhooks, WhatsApp/SMS APIs, and Google Sheets.
- Designed time-series demand forecasting models to improve inventory planning and reduce reactive procurement.

DATA ENTRY & MANAGEMENT ASSISTANT | CLEANSERVE ENERGY SOLUTIONS, KANO **MAY 2024 – DEC 2024**

- Maintained accurate fuel inventory and delivery records, ensuring data consistency and timely operational reporting.

DATA ANALYST INTERN | MEGARIVET NIGERIA LIMITED, KANO, NIGERIA **JAN 2023 – JUN 2023**

- Cleaned large construction datasets and analysed them to find patterns predictive of delays and cost overruns, giving management early warning signals.

EDUCATION AND CERTIFICATIONS

B.Eng. Civil Engineering | Bayero University Kano	2024
Hugging Face AI Fundamentals Certificate	2026
Applied AI Lab: Deep Learning for Computer Vision	2025
Google Data Analytics Professional Certificate	2023

SKILLS

AI & LLM Systems: LLMs, RAG, Agentic AI, MCPs, TypeScript.
Machine Learning: PyTorch, MLPs, CNNs, scikit-learn, XGBoost, YOLO, SAM, time-series forecasting.
MLOps & Cloud: GCP (Cloud Run, Compute Engine, Cloud Storage), Docker, CI/CD, MLflow, model versioning, Git
Backend & Orchestration: FastAPI, Django REST Framework, REST APIs, n8n, Zapier
Data & Geospatial: Python, SQL, Pandas, NumPy, Matplotlib, Seaborn, EDA, QGIS.
